**on**  
**MULTIDISTRICT LITIGATION**

**IN RE: E.I. DU PONT DE NEMOURS AND COMPANY**  
**C-8 PERSONAL INJURY LITIGATION**

MDL No. 2433

**TRANSFER ORDER**

**Before the Panel:**\* Pursuant to 28 U.S.C. § 1407, defendant E.I. du Pont de Nemours and Company (DuPont) moves to centralize this litigation in the Southern District of Ohio or, alternatively, in the Southern District of West Virginia. This litigation currently consists of twenty-six actions pending in the Southern District of Ohio and the Southern District of West Virginia, as listed on Schedule A.<sup>1</sup>

All of the responding parties agree that centralization is appropriate. In addition to DuPont, plaintiffs in twenty-five actions support centralization in the Southern District of Ohio. Plaintiffs in four potential tag-along actions in the Southern District of Ohio and the Southern District of West Virginia request centralization in the Southern District of West Virginia. Plaintiffs in another four potential tag-along actions seek centralization in the Eastern District of New York. Notably, every party supports centralization in the Southern District of Ohio, at least in the alternative, and several parties also suggest the Southern District of West Virginia as an alternative transferee forum.

On the basis of the papers filed and the hearing session held, we find that these actions involve common questions of fact, and that centralization under Section 1407 in the Southern District of Ohio will serve the convenience of the parties and witnesses and promote the just and efficient conduct of this litigation. All the actions are personal injury or wrongful death actions arising out of plaintiffs' alleged ingestion of drinking water contaminated with a chemical, C-8 (also known as perfluorooctanoic acid (PFOA) or ammonium perfluorooctanoate (APFO)), discharged from DuPont's Washington Works Plant near Parkersburg, West Virginia. All of the plaintiffs in this litigation allege that they suffer or suffered from one or more of six diseases identified as potentially linked to C-8 exposure by a study conducted as part of a 2005 settlement between DuPont and a class of approximately 80,000 persons residing in six water districts allegedly contaminated by C-8 from the Washington Works Plant. *See Leach v. E.I. Du Pont de Nemours & Co.*, No. 01-C-608 (W. Va. Cir. Ct.). Centralization will eliminate duplicative discovery; prevent inconsistent pretrial rulings; and conserve the resources of the parties, their counsel and the judiciary.

---

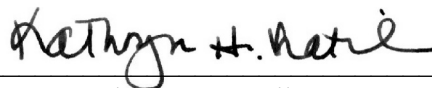

\* Judge John G. Heyburn II took no part in the decision of this matter.

<sup>1</sup> The parties have notified the Panel of eleven additional related actions pending in the same two districts. These and any other related actions are potential tag-along actions. *See* Panel Rule 7.1.

Weighing all factors, we have selected the Southern District of Ohio as the transferee district for this litigation. All the parties agree—at least in the alternative—that transfer to the Southern District of Ohio is appropriate. The majority of the related actions are pending in this district, including the first-filed and most advanced action. The Southern District of Ohio is both accessible and convenient for parties and witnesses. Four of the six water districts allegedly contaminated by C-8 are in the Southern District of Ohio, as are the majority of potential plaintiffs. Further, centralization in this district permits the Panel to assign the litigation to a less-utilized district with an experienced judge who is not presently overseeing a multidistrict litigation.

IT IS THEREFORE ORDERED that pursuant to 28 U.S.C. § 1407, the actions listed on Schedule A and pending outside the Southern District of Ohio are transferred to the Southern District of Ohio and, with the consent of that court, assigned to the Honorable Edmund A. Sargus, Jr., for coordinated or consolidated pretrial proceedings with the actions pending there.

PANEL ON MULTIDISTRICT LITIGATION
